Seasoned. Committed – Digital Supply Chain Experts

About Us

At Beelogix, we're committed to helping our clients build a competitive advantage by leveraging supply chain solutions. Always on the cutting edge, we select, design and provide support for supply chain solutions – from the simple to the complex. We focus on providing planning and execution of SAP solutions, and the expertise, passion and dedication of our team is the heart and soul of our organization. As an official SAP services/sell partner, our company's consultants must acquire and maintain certifications related to supply chain solutions. By ensuring team members receive certifications and expertise, Beelogix is creating a team that sets the standard for excellence.

SAP IBP: Your Premier Planning Solution

Accelerate your deployments, empower employees and allocate resources with SAP Integrated Business Planning. Powered by in-memory computing technology, this cloud-based solution combines capabilities for sales and operations, demand, response, supply planning and inventory optimization to maximize your profitability. Featuring packages like SAP HANA, SAP supply chain, sales and operations planning and more, you gain a state-of-the-art platform for driving efficiency and optimizing the way you do business. Beelogix has created add-ons for IBP based on our years of experience implementing IBP to accelerate customers' time to value and reducing the total implementation time and costs.

SAP IBP delivers value to your business with:

- › Simplified management
- › Real-time analytics
- › Unified tools
- › Simulations and scenarios
- › S&OP process structuring

Digital Supply Chain

Plan, source and deliver your products and services quicker and more efficiently. As an SAP partner, we'll implement supply chain management solutions to help you run real-time operations that utilize AI and IoT to provide full visibility and analytics. You'll gain:

- › Frequently updated forecasts
- › Predictive analytics
- › Improved visibility
- › Minimal unplanned costs
- › Actionable intelligence
- › 24/7 support
- › Supply chain collaboration
- › Cloud-based deployments
- › Product lifecycle sourcing
- › Event-driven operations

Transportation Management

Reduce transportation complexity with transportation and logistics management software. Using advanced features dedicated to all aspects of transportation, SAP TM manages transportation by road, sea, air and rail. Fine-tune your process and experience:

- › Decreased transportation costs
- › Strategic freight sourcing
- › Optimized resource availability
- › Streamlined carrier collaboration
- › Improved customer visibility
- › Simplified cost distribution

Extended Warehouse Management

Streamline the distribution process and manage high-volume warehouse operations with Extended Warehouse Management. Designed by SAP as a best-of-breed solution, SAP EWM has advanced features meeting the required flexibility, velocity and productivity of today's warehouses. We'll optimize unloading, consolidation, backflush, packing, staging, loading and more. SAP EWM provides:

- › Put-away and picking strategy
- › Inventory optimization
- › Engineered labor standard
- › Precise 3D mapping
- › Performance indicators
- › Mobile applications

Whether you're looking to optimize your supply chain or need to improve your business processes, Beelogix has you covered. Our seasoned experts are certified and bilingual to better support your needs. **Contact us today** to overcome challenges in your supply chain.
